Profile

I am a person passionate about technology. I am looking to work in a collaborative company that leverages my creativity, uses modern technologies, always seeks innovation, and has a customer-focused approach. I have exceptional skills in communication and teamwork, and I am a very understanding and easy-to-work-with person.

Skills

HTML | CSS | JavaScript | TypeScript | ReactJS | NodeJS | APIs REST | NestJS | ExpressJS | JWT | Jest
SuperTest | PostgreSQL | Prisma | Redis | MongoDB | Git | DevOps | Docker | AWS | Trello | Scrum

Education

08/2020 — present **Bachelor in Computer Science,** *UNIFG*

06/2022 — 05/2023 **Software Engineer FullStack,** *Driven Education*
- Intensive training of +1,200 hours focused on +25 practical projects.
- Front-end and back-end with web technologies: ReactJS, NodeJS, JavaScript, TypeScript, Prisma, among many others.
- Fundamentals of software engineering: logic, algorithms, data structures, OOP, architecture, optimization, performance, and clean code.
- Relational and non-relational databases with PostgreSQL, MongoDB, and Redis.
- Principles of DevOps with GitHub Actions, Docker, and AWS.
- Unit, integration, and end-to-end testing with Jest and SuperTest.
- Development of behavioral competencies and Agile methodologies such as Scrum.

02/2013 — 12/2015 **Bachelor in Graphic Design,** *IFPE*

Projects

01/2023 — 03/2023 **Driven.t,** *Event Management Software* ⧉
- Technologies Used: Node.js, TypeScript, Express, React.js, PostgreSQL, Jest, Redis, Prisma.
- I developed and implemented software to manage events with a team of 4 people, using agile methodologies, over 3 sprints.
- I implemented the functional payment system integrated with the Stripe payment platform, incorporating all the necessary validations for real payments.
- I implemented login/registration using GitHub OAuth.
- I designed and implemented the routes for registration, subscription, and payments.

11/2022 — 01/2023 **Linkr,** *Social Network for sharing links* ⧉
- Technologies Used: JavaScript, Node.js, Express.js, React.js, PostgreSQL.
- I developed and implemented a social networking application for link sharing with a team of 4 people.
- I implemented the system for likes and dislikes.
- I implemented the system for post metadata.
- I designed and implemented the routes for likes, dislikes, link posts, and link metadata retrieval.

09/2022 — 10/2022 **MyWallet,** *Financial Management Software* ⧉
- Technologies Used: JavaScript, React.js, Node.js, Express.js, MongoDB, Styled-Components.
- Responsible for independently designing and developing both the FrontEnd and BackEnd of the application.
